Summary

Tax software expert and project lead with diverse development experience. Recognized for effective communication, team leadership skills, and creative problem-solving including reverse-engineering work papers through technology.

Experience

InsightSoftware: Longview Solutions, Chicago, IL
Consultant, Professional Services   May 2019 – Present
- Acting Implementation Team Lead for international and domestic companies with revenues from $636 million to $21 billion.
- Implements out-of-box configuration to automate and transform provision processes by initializing, implementing, and supporting Longview Tax Environments and add-ons native to Longview.
- Creates and configures custom calculations and reporting solutions using Longview Application Framework library in Longview Excel Add-in, Data Import Applications, Data View Input, and Free Form Applications.
- Demonstrated the benefits of upgrading or expanding Longview services to clients and created cost estimates for services.

Ryerson, Inc., Chicago, IL
Project Tax Analyst for Metal Distribution Corporation   June 2016 – May 2019
- Trained and maintained OneSource Provision, OneSource Income Tax, SAP software, and other company tax work papers.
- Drafted company-wide policy to abide by current federal tax law.
- Drafted and reviewed company's tax provision, account reconciliations, book to tax difference workpapers.
- Prepared Federal, State and Local tax returns.

Deloitte Tax, LLP, Chicago, IL
Tax Consulting Intern for Business Tax Services   January 2016 – April 2016
- Prepared and filed tax returns on database software and composed Informational Document Requests for IRS audits.

United States Securities and Exchange Commission Division of Enforcement, Chicago, IL
Part Time Honors Program Accounting Intern for a Federal Regulatory Agency   September 2014 – November 2014
- Analyzed forensic data in privileged and confidential U.S. government documents for potential lawsuits involving fraud.

Projects

Aquarium4noobs | https://github.com/garizpe9/Aquarium4noobs | https://aquarium4noobs.herokuapp.com/
- Web application for new aquarium builders that provides selection of tank size and ability to select the fish in the site's aquarium. The app also has a feature for people who want to submit new fish to be included in the aquarium selection.
- Managed timeline and responsibilities of overall project, created the MySql database with Sequelize, connected the database to the server, used Sequelize to create queries for "GET" and "POST" with node express URLs to receive and post MySql information, created a call back from API route to front-end JavaScript, created the HTML form for the 'newfish' URL, and created the CSS background and button formatting.
- Languages: HTML5, CSS3, jQuery, MySql, Node.js, Sequilize.js, Express.js, Express-Session.js, Handlebars.js

Pizza by the Byte | https://github.com/garizpe9/PizzabytheByte | https://garizpe9.github.io/PizzabytheByte/
- Web application that uses Google Maps API and Yelp API to pinpoint nearest mapped pizza places and creates a table of the restaurant names, ratings, and price points.
- Managed the timeline and responsibilities of overall project, identified applicable CORS API and created jQuery to create a table from the Yelp API using jQuery
- Languages: HTML5, CSS3, jQuery
